

## Frequently Asked Questions

Q: How do I program my TV for the NMSU channels?

A: Of course, it depends on the manufacturer of your TV. Generally, you select “menu” from either your remote control or the front panel of your TV and then select “channel setup”. Most newer TVs will Auto-program and may have that selection on the menu. If not you will have to add each channel manually.

Q: What do I do if my cable goes out?

A: First, check your cable connections at both your TV and at the wall outlet. If they appear to be okay, contact your room advisor (RA). Your RA will in turn contact ICT to schedule a technician to assist you.

Q: How do I order the HBO or Showtime packages?

A: Please see the inside section of this guide for specific information on ordering either of these packages.
